PSP Dynamic Ltd.

COMPANY PROFILE

PSP Dynamic Limited (Formally known as PS Polyplast Pvt. Ltd.), is the flagship company of young and dynamic. PSP Group was established in 2010 and based in Alwar, Rajasthan, (NCR) India, which has diversified business in plastic, wire & cable, and allied products for the Building materials industry.

The core management team of the company consists of 4 professionals with 2-3 decades of industry experience including in wire & cable, uPVC Profiles, uPVC, and aluminium Windows & Doors industry at senior level positions.

The company has country-wide customer-friendly marketing network for promoting PSP brand uPVC profiles, uPVC and aluminium Windows & Doors, and Wire & Cable with Architects, Influencers, Interior designers, Consultants, and Builders. The fabricators will be provided with technical support in setting up the fabricating unit.

Company Growth-

1. In year 2010-2011 - This is the year of company establishment, started the business with the distribution ship of wide range of wire & Cables and electrical goods.

2. In year 2014-2015 - The company has set up a state-of-the art plant at Matsya Industrial Area at Alwar, Rajasthan with imported high-speed extrusion lines and ultra-precision tooling of latest technology to produce India's best extra high UV resistant uPVC door and window profiles under the brand name PSP, completely meeting the British Standard BS EN 12608 with class-B wall thickness (2.5 mm for outer wall). The profiles are lead free, RoHS compliant supported by German technology, and extruded out of specially formulated compounds to meet the tropical Indian climatic conditions which are severe compared to climatic conditions of European countries, China, etc.

The product range also includes laminated profiles with base colour matching the foil shades. The laminated foils used are suitable for tropical climatic conditions.

3. In year 2018-2019 - The company enhance its production capability by doubling it from 6000 MT to 12000 MT Annually of uPVC Profiles. Established a modern and hi-tech plant to manufacture, supply & installation of uPVC Windows & Doors.

4. In year 2019-2020 - Established a modern and hi-tech plant for the fabrication of aluminium Windows & Doors with the capacity of 6 lacs sqft. annually.

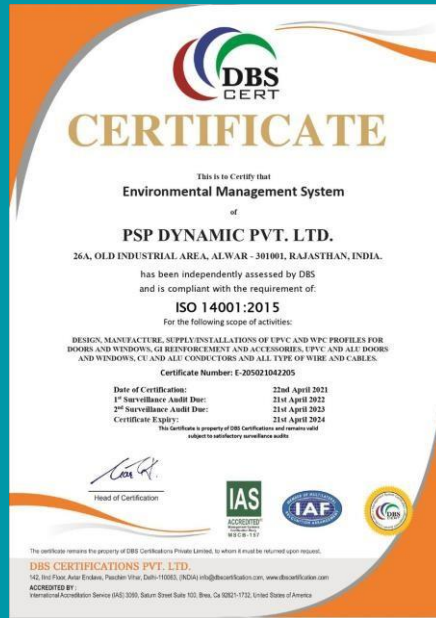

5. In year 2020-2021 – Established a modern and highly equipped plant for manufacturing of all type of Electric Wire & Cables, supported by German technology in old Industrial area at Alwar, Rajasthan (NCR) India.

Wire and cable plant having all imported equipments and high precision machines which are capable to produce high-quality products with the lowest manpower and lowest consumption of energy.

This product is also approved by CE Certification and got the BIS relevant licenses.

Certification and licenses:

Wide Range of uPVC Doors & Windows

Casement Windows and Doors:

Window, opening on the wall of a building for the admission of light and air; windows are often arranged also for the purpose of architectural decoration. PSP 60 range casement windows and Doors with profile depth of 60 mm are available in both Outward and Inward opening styles side hung applications with single-point and multi-point locking options.

Fixed Windows:

A Window that can not be open still gives you a bright view of the outside world. PSP window provides you various design options in that also. Fixed windows are recommended where light or vision or insulation are alone needed.

Top Hung Windows/Ventilators:

A top-hung window is also known as an awning window which is used for ventilation purpose.

PSP Top hung windows give you an attractive look and proper ventilation to your buildings.

French Doors:

Two adjoining doors that have glass panes extending for most of its length and are hinged at opposite sides of a doorway so that they open in the middle

Sliding Windows and Doors:

PSP uPVC Sliding Doors & Windows, designed with heavy-duty smooth rollers & most suitable hardware. These are available in 2 track, 2.5 track, 3 track, 4 track, and mono track. Also, it may design with 2 shutters to 8 shutters and available with mesh & without mesh provision.

Slide and Fold Doors:

Slide and Fold offer generous and barrier-free access to terraces, conservatories, conference rooms, wherever needed. This new-generation door, designed for large openings, joins multiple sashes in a unique slide and fold mechanism.

Arch Windows:

The arched window is curved or half circle at the top and looks beautiful. Arch windows can be openable to let in fresh air or fixed to only let in light. It gives a traditional look to your building.

Tilt and Turn Windows:

Tilt and turn windows are popular choices due to their excellent weather proofing and security features. Tilt and turn windows can be opened fully like a casement window (inwards) or they can be tilted from the bottom so that the top of the window is angled into the room, giving a smaller opening for ventilation. The tilted opening also has the added benefit of increased security and safety as no one can fit through the gap.

Twin Sash with grill window:

Twin sash window combines traditional fly mesh panel with casement window to provide a classic aesthetic look. A grill option also ensures the security of the window. Twin sash is a great combination of good looks and high standards of security.

Louvre Windows

For extraordinary ventilation purposes, the louvered uPVC windows are preferred extensively. These windows are beautifully framed and designed to allow fresh air in your home. This design is especially used in homes and huge structures for ventilation purposes.

- They are easy to install and can be used to change the character of any room extend it or bring in more light.
- A new age window material made from UV-resistant UPVC blend to withstand the extreme climate.
- Superior insulation from outside heat as UPVC is a poor conductor of heat.
- Professional installation and perfect sealing ensure insulation from noise, dust & pollution.
- Does not expand, rust, or corrode, and never fades.
- Rain track and sill insulates from rain and hurricane bars withstand strong winds.
- Termite resistant and low maintenance-requires no painting only routine cleaning.
- Self-extinguishing and does not propagate fire: Allow easy escape in case of fire.
- It's recyclable and consumes far less energy in its conversion from raw material to a finished product.

PSP Dynamic Doors and Windows Features

RoHS COMPLIANCE

Our profile, under the brand name PSP, is supported by German technology and extruded strictly adhering to British Standard BS EN 12608:2003 with class-B wall thickness of 2.5 mm for outer walls and lead free in compliance with RoHS protocol,

SOUND INSULATION

Our windows are designed with special noise-resistant properties which reduce the noise. This double-seal system allows acoustic control requirements in your home and keeps the noise outside.

HIGHLY DURABLE

Extra Durability PSP windows do not warp, twist, or split. Impact modifiers in our profiles are treated with special additives, thereby making the material extremely long Lasting. Due to the nature of the materials used, these frames remain highly durable even after years of usage

AESTHETIC LOOK

uPVC windows and doors give your home a premium and aesthetic look and it comes in various style configurations and colours that suits different home décor. You can even customize your uPVC windows and uPVC doors to suit your home décor and budget.

LOW MAINTENANCE

Windows and doors made from uPVC can last for decades without any sign of weathering, and they can be cleaned easily and need to wiping only occasionally. You just need to wipe down clean with soapy water to prevent staining and remove grim or dirt from it.

AIR TIGHTNESS

We use High-Quality Weather Strips in our uPVC windows to ensure that all sliding windows are airtight and do not allow any air to enter from outside.

ENERGY SAVING

UPVC is at the forefront when it comes to energy efficiency as it guarantees excellent insulation, saving on air-conditioning, and heating power costs in offices, homes, or commercial centers.

UV PROTECTION

The uPVC windows have a hardened chemical makeup which includes titanium dioxide & other chemical compounds. The windows are designed in such a way that they are better able to resist the UV rays and keep them unspoils.

FIR RESISTANT

Fire Resistant: PSP uPVC Window & Doors are fire resistant and after removing the source of the fire it will be automatically distinguished within 60 seconds.
